

**VAN STRAATEN**  
LET'S IMPRESS

## *Instructions: How to Exchange a Visual*

### *Taking out the old visual:*

Take out the old visual by pulling the little strap.

### *Inserting a new visual:*

To insert the new visual please follow the pictures below. Please take into account the following considerations:

- Wash your hands before mounting the visual, or use handgloves. Especially white, unprinted parts of the visual can be spoiled easily.
- Start mounting the fabric of the visual in the corners of the frame. Fold the silicon fittings together in the corner and mount the fabric in the frame contour.
- When the fabric of the visual is mounted in all corners proceed the mounting fabric at the sides of the frame. Start with the longest framesides at the middle and mount to the corners. Then proceed with the short sides of the frame in the same way.
